ZONES

Security
FORTIFICATION
Protecting Your Users and Your Data

Safety First. Second. And Third.

Let's face it – data is the lifeblood of your business. And ensuring the security of your endpoints, networks, data centers, and the cloud is ours. That's why we provide solutions designed to safeguard your data in use, in transit, and at rest.

Endpoint Security • Data Center Security • Authentication and Access Control
Next Gen Firewall and IPS • Data Loss Prevention • Web and Email Security

Data Center

- Protect corporate servers from harmful viruses and malware
- Defend against accidental or malicious data loss
- Monitor security alerts for incident response

Mobility

- Protect mobile devices from viruses & malware
- Require policy compliance before devices access network resources
- Manage apps & data including mobile content

Collaboration

- Secure endpoint, servers, and network from attacks
- Manage high-risk areas (email, USB, & social media)
- Monitor sensitive data for leaks

Cloud

- Secure public cloud workloads
- Enable scalable hybrid cloud protection
- Identify & scan cloud content to determine if its being stored securely

IoT

- Manage and minimise threats at the edge
- Establish secure identifiers for devices
- Perform system testing and calibration

Networking

- Deploy traditional and network-based firewalls
- Enable intrusion detection and prevention technologies
- Establish authentication and encryption protocols
